- Panidhan**—An arrangement under which a part of cash-rent is paid in kind at the current market rate.
- Pani-nala**—Water channel, drain.
- Pathakar**—Road cess.

- Patit**—Fallow.
- Patta**—Lease.
- Pentha**—Place near a river where cargoes are stocked for sale.
- Phakiran jagir**—Rent-free grant to Muhammadan *fakirs* or mendicants.
- Phalabhag**—Division of fruits between the landlord and the tenant.
- Pi**—Abbreviation of Pita, father.
- Pirasthan**—Place where the grave of a *pir* is situated.
- Pirottar**—Land held in perpetuity in trust for the worship of a *pir* by Muhammadans.
- Pitrals**—Ancestral lands.
- Pokhari**—Tank.
- Pra**—Abbreviation for *pargana*.
- Prachalit jama**—Existing rent.
- Prajadakhal**—Lands in the possession of tenants.
- Pursethi madhyasatwadhikari**—A class of permanent tenure-holders not necessarily sub-proprietors. See sub-proprietor.
- Purana patit** or **Puranaparia**—Old fallow land not cultivated within two years of the preparation of the record of rights.
- Rakba**—Area.
- Rakba khariddar**—Purchaser of specific area of *nijchis* or *anabadi* lands of a *tauzl*.
- Rakhit**—Reserved land, land reserved for grazing or other communal purpose with the consent of landlord.
- Rakhitjogya**—Fit for reservation.
- Rasta**—Path, road.
- Raiyat**—Class of tenant as defined in section 5 (2) of the Orissa Tenancy Act.
- Re**—Abbreviation for Registered.
- Sa**—Abbreviation of *Sakin*.
- Sabak chaukidari jagir**—Land which was formerly *chaukidari jagir* but has been resumed and assessed to rent.
- Sadarjama**—Land revenue.
- Sadhadalil**—Unregistered deed or document.
- Sadharan**—Ordinary.
- Safa**—Page or page total.
- Safai nala**—Drainage cut.
- Samil**—Included in.
- Samiljama khata**—A holding of which the rent is included in the rent of another holding.
- Samilat**—Common; used of lands held in common under more than one estate or tenure.
- Sanja**—A kind of produce-rent in which a fixed quantity of the produce is payable irrespective of the total yield.
- Sankranti**—First day of the Oriya solar month.
- Saradha**—Winter rice.
- Sarbarakar**—A class of tenure-holder, not always a sub-proprietor (see sub-proprietor). These are not the same as the Khurda *sarbarakars*.
- Sarbasadharan**—Public; land in which the public has acquired a right of way or easement, irrespective of the landlords' consent; distinguished from *Rakhit*.
- Sasan**—A settlement of Brahmins, generally held rent-free or on quit rent (*tanki*).
- Se**—Abbreviation for *sebaet*.
- Sebaet marfatdar**—Person who is both the trustee of the property of an idol and also performs the actual services.
- Sevak**—One whose duty is to perform religious services to an idol.
- Sikmi**—Status of an under-raiyat.
- Sikmi dakhil stwabisista**—*Sikmi raiyat* having right of occupancy.
- Sikmi jamidar**—A class of sub-proprietors.

Sikmi kharid madhyasatwadhikari—A class of permanent tenure-holders mentioned in section 15 of Orissa Tenancy Act, described in Maddox Report, Volume I, paragraph 290.

Sikmi-mafidar—Under *raiyat* holding without payment of rent.

Smashan—Cremation ground.

Sthiban—Status of settled *raiyat*.

Sthitiban—*babat nijjote*—Settled *raiyat* cultivating *nijjote* land having right of occupancy therein.

Suansia—A labourer employed throughout the year, getting a *jagir* as reward.

Sub-proprietor—All persons who are sub-proprietors as defined in section 3 (21), Orissa Tenancy Act, have been described by this term.

Sunia—First day of the Oriya year.

Swa—Abbreviation of *swami*.

Swami—Husband.

Tankibahel sub-proprietor—A class or sub-proprietors, as defined in section 3 (21) (i), of the Orissa Tenancy Act. See sub-proprietor.

Tarai—Same as *Ghatia*.

Tasdik—Attestation.

Tasdik jama—Attested rent; rent recorded as legally payable at the time of attestation.

Teyedad—Consideration money; valuation of property.

Terij—Abstract of *khatians*.

Tola—Hamlet.

Utbandi Dakhalsatwa sunya—Status of a tenant who holds land on the *utbandi* system without having acquired occupancy right.

Forms of land revenue Kabuliyats.

I take the proprietary settlement of estate
for years, from tauzi no district
at an annual net revenue of rupees to subject to the following
conditions:—

I shall not permit any encroachment to be made on the plots specified in the schedule of plots reserved nor permit any action rendering them unfit to be used for the purposes specified in the schedule. I shall not collect any rent or grazing charge on account of these plots so long as this lease continues in force. I also bind myself to report all trespassers thereon to the Collector and to take action in the courts to eject them if the Collector requires me to do so.

9th.— I admit that Government has the right to all minerals in my estate, excluding laterite and limestone, and that, in case minerals are found, Government is entitled to them and to right-of-way, and other reasonable facilities for working and carrying away such minerals.

10th.— I bind myself to grant receipts for and maintain proper accounts of rents realized by me as enjoined by the tenancy laws for the time being in force. I shall file in such public office as may be prescribed any measurement, collection or other zamindari papers that may be from time to time called for from me by the Collector, or by any officer duly empowered by the Board of Revenue.

11th.— The settlement has been made with me in anticipation of, and subject to, the sanction of the superior revenue authorities whose orders, if any, will be carried out by me with effect from the commencement of this lease. The settlement will not be valid unless it is sanctioned by such authorities or if it is set aside by them.

12th.— Neither I nor my heirs or representatives shall be at liberty to raise any objection to the re-measurement of my estate, or to the preparation of record-of-rights and settlement of rents under any orders of Government which may be passed in view of re-settlement of the land revenue or otherwise or to a re-assessment of the land revenue with effect from the expiry of the present settlement, and until such re-assessment of revenue is made, I shall hold the estate on summary settlement from year to year and shall not require from Government any notice of its intention to revise the settlement.

13th.— On breach of any of the above conditions, or on failure to perform any of the duties imposed upon me by the above twelve clauses, I hereby acknowledge on behalf of myself, my heirs and representatives that in addition to any other penalties to which I may be liable, the Collector may, with the sanction of the Board of Revenue, take my estate under khas management and pay me malikana, as provided in sections III and V, Regulation VII of 1822.

II.—FORM OF KABULIYAT FOR PROPRIETOR WHERE THE WHOLE OR A PORTION OF THE ESTATE IS HELD BY A SUB-PROPRIETOR,

I take the proprietary settlement of estate.....,tauzi no.....,
district foryears from.....to
....., at an annual net revenue of rupees
subject to the following conditions :—

1st.—I shall be at liberty to sell, alienate, or otherwise transfer, the whole, or any share, of the said estate subject to the terms of this settlement, but I shall remain liable for the revenue assessed thereon unless and until the transfer is registered under the provisions of Act VII (B. C.) of 1876. And, notwithstanding such transfer so long as my name stands recorded in the Collector's registers, maintained under the provisions of the said Act VII (B. C.) of 1876, or of any other similar law for the time being in force, with respect to any share or interest in the estate, I shall continue to be jointly and severally liable with other sharers, if any, for the whole revenue of the estate.

2nd.—I will pay the aforesaid amount of Government revenue, *kist* by *kist*, according to the *kistbandi* noted on the back of this engagement.

I hereby admit that I have no right or claim to any abatement of revenue on the ground of inundation, drought, or any other calamities of season.

3rd.—On the occurrence of any agricultural calamity where Government has suspended or remitted the whole or any portion of the revenue for any period, I shall suspend or remit rents payable to me by tenants to an amount which shall bear the same proportion to the whole of the rent payable to me as the land revenue of which the payment has been suspended or remitted bears to the whole of the land revenue payable by me, and for the same period, and if I fail to do so the Collector shall be at liberty to withdraw the suspension or remission granted.

4th.—Where under any rules approved by Government for reduction or remission of assessment on account of deterioration of soil or failure of improvements which were taken into account when the assessment was made, the Collector has sanctioned a reduction or remission of revenue, I shall make an equivalent reduction or remission of rent to my tenants of all descriptions to an amount which shall bear the same proportion to the whole of the rent payable to me as the land revenue of which a reduction or remission has been sanctioned bears to the whole of the land revenue payable by me, and if I fail to do so, the Collector shall be at liberty to withdraw the reduction or remission granted.

5th.—I shall not interfere, except by process of law, with the rights of all tenure holders, under-tenure-holders, *rai-yats*, under-*rai-yats* and other tenants recorded in the settlement papers and shall not collect from them any higher rents than those recorded in the present settlement proceedings, except in accordance with the law for the time being in force relating to the enhancement of rents. I will not collect or attempt to collect any illegal cess or *abwab* or exact forced labour.

I will collect the amounts due from sub-proprietors as recorded in their *kabuliyats*, and will respect and observe all customary rights and special incidents of the tenures.

I will pay the whole revenue of the estate whether I collect the amounts payable by the sub-proprietors or not.

6th.—On the expiry of the aforesaid period of settlement, I, or my legal representatives, shall have the right to a renewal of the settlement on the revenue that may be then fixed, and if we do not take the settlement on the revenue that may be then fixed, we shall be entitled to receive *malikana* at the usual rates.

7th.—I recognize and admit that Government has the right to maintain or abandon any public embankments or drainage works upon my estate or on neighbouring land, and that payment of the land revenue of my estate is not to be dependent upon such maintenance, or to be affected by such abandonment.

8th.—If any waste lands in the portion of the estate under direct collection be brought under cultivation, my right to receive the rents derivable therefrom without increase of revenue will continue during the currency of this settlement.

I shall not permit any encroachment to be made on the plots specified in the schedule of plots reserved nor permit any action rendering them unfit to be used for the purposes specified in the schedule. I shall not collect any rent or grazing charge on account of these plots so long as this lease continues in force. I also bind myself to report all trespassers thereon to the Collector and to take action in the courts to eject them if the Collector requires me to do so.

9th.— I admit that Government has the right to all minerals in my estate, excluding laterite and limestone, and that, in case minerals are found, Government is entitled to them and to right of-way, and all other reasonable facilities for working and carrying away such minerals.

10th.— I bind myself to grant receipts for and maintain proper accounts of rents realized by me as enjoined by the tenancy laws for the time being in force. I shall file in such public office as may be prescribed any measurement, collection or other *zamindari* papers that may be from time to time called for from me by the Collector, or by any officer duly empowered by the Board of Revenue.

11th.— This settlement has been made with me in anticipation of, and subject to, the sanction of the superior revenue authorities whose orders, if any, will be carried out by me with effect from the commencement of this lease. The settlement will not be valid unless it is sanctioned by such authorities or if it is set aside by them.

12th.— Neither I nor my heirs or representatives shall be at liberty to raise any objection to the re-measurement of my estate, or to the preparation of record-of-rights and settlement of rents under any order of Government which may be passed in view of re-settlement of the land revenue or otherwise, or to a re-assessment of the land revenue with effect from the expiry of the present settlement, and untill such re-assessment of revenue is made, I shall hold the estate on summary settlement from year to year and shall not require from Government any notice of its intention to revise the settlement.

13th.— On breach of any of the above conditions, or on failure to perform any of the duties imposed upon me by the above twelve clauses, I hereby acknowledge on behalf of myself, my heirs and representatives that in addition to any other penalties to which I may be liable, the Collector may with the sanction of the Board of Revenue, take my estate under *khas* management and pay me *malikana*, as provided in sections III and V, Regulation VII of 1822.

DEPARTMENT OF LAND RECORDS AND SURVEYS,
BIHAR AND ORISSA.

FROM

P. T. MANSFIELD, ESQ., I. C. S.,
DIRECTOR OF LAND RECORDS AND SURVEYS,
BIHAR AND ORISSA.

To

THE SECRETARY TO THE BOARD OF REVENUE,
BIHAR AND ORISSA.

Dated the 28th November 1932.

SIR,

I HAVE the honour to submit the Final Report on the recent Orissa Settlement, written by Mr. W. W. DALZIEL, I. C. S.

2. The post of Settlement Officer was held by Mr. Toplis (18 months), myself (3 years), Mr. Reuben (9 months), Rai Sahib Phanindra Nath Gupta (4½ months), Mr. Scotland (1 year and 4 months), Mr. Dalziel (2½ years) and Mr. Samuel Das (4 months). The operations began in 1922 and ended in 1932. The settlement was in the main a revision settlement, and one of the most important objects was the revision of the revenue settlement, which expired in 1927; but certain of the permanently-settled estates, viz. Sukinda, Marichpur and Harishpur and the estates of North Balasore, as well as Patia, were surveyed, and a record-of-rights prepared for them under the Orissa Tenancy Act, for the first time. In Kanika and Kujang also, though maps and records had been prepared in settlements under the Court of Wards, this was the first authoritative record-of-rights under Chapter XI of the Orissa Tenancy Act. The programme included the whole of the three districts except Banki, but Darpan, Madhupur, Dompara and the Jagir Mahals were subsequently excluded, as they had all been done within the last 20 years or so; the existing record was sufficiently up-to-date for all practical purposes, and there is no necessity to put the burden and expense of survey and settlement on estates at such short intervals if it can be avoided.

3. It was unfortunate that for the temporarily-settled estates there were three surveys and settlements concluded at such short intervals as 1900, 1913 and 1932, and a suggestion was made to me by Mr. Toplis that, if it had been possible to secure an enhancement of revenue by agreement, there would have been no necessity for a revision of the record at so great a cost and so early a date. This did not appear practicable in the temporarily-settled estates, especially as the operations had already started, but in 1927 I proposed that the resettlement of Khurda Government Estate was not necessary, if an enhancement of rent could be secured by compromise. The proposal was accepted; and after a great deal of hesitation, engineered by agitators, the tenants executed agreements for enhancement of their rents by two annas per rupee. Assistant Settlement Officers were gazetted as sub-registrars; the *kabuliats* were printed and were filled up in duplicate, and by these means the work was rapidly finished. The rents are still moderate, but the enhancement would probably not have been greater even if a settlement had taken place, and the expense and trouble of a settlement were avoided.

4. Even after the exclusion of the above-mentioned estates, the total programme was enormous. Maps and records were prepared for 11½ million

plots, rents were settled for nearly two million tenancies in the temporarily-settled estates alone, and revenue was settled for over 11,000 estates and over 3,500 sub-proprietors.

5. The difficulties in the first year were very great and Mr. Toplis and the few experienced officers with him had a trying time. The annual programme was too big (it was cut down in the third year, by extending the whole programme for a year longer); the staff was untrained, most of the Oriya staff had little or no knowledge of survey except by the pole, and the nucleus of Bihari staff was ignorant of the language, rules had to be framed; there was a severe epidemic of malaria, and the blue prints of the last settlement maps were so distorted that accurate survey was almost impossible.

6. Throughout the operations the annual programme was still so heavy that there was practically no recess. Camps were out all through the rains, and so-called recess work went on during the cold weather. It often happened therefore that between 2,000 and 3,000 men were employed. It is not surprising that there were some convictions (19), and dismissals (78), as well as scores of men removed from service. Two gazetted officers on probation, and four non-gazetted officers were also removed.

7. The difficulties were gradually overcome as the years went on. The difficulty about the blue prints was overcome by obtaining them from the maps of the Provincial Settlement of 1900, and not from those of the Revision Settlement of 1912, the latter had apparently become distorted by being carried about in the field by hand, instead of on the plane table. Classes were organized to train the staff. Mr. Scotland pointed out that even in the third year some of the Oriya *amins* were still doing too much of the survey by the pole instead of by the chain, and in the last three years survey by pole was forbidden, and all survey was done by *shikmi* lines. The main points to be attended to in *khanapuri* and attestation were reduced into a concentrated form which the *amins* had to learn. *Peshkars* and other were graded, and differential rates and rising scales of pay were introduced, in place of the old flat rates. In recess, work was stopped for a short interval daily, while officers instructed their staff in the rules. The work of the staff gradually improved and in the latter years the general quality was good.

8. The variety in the classes of estates in Orissa made the settlement one of great interest, but complicated. There are *khas mahals*, temporarily-settled estates, permanently-settled estates, and revenue-free estates. Complications arise from the fact that in many respects the Tenancy Act makes different provisions for the temporarily-settled estates and those which are not temporarily-settled. To give only one example, in the former the rights of transfer of occupancy rights are laid down, and in the latter they are governed by custom, and the custom varies from estate to estate. Thus the rules had, in regard to several matters, to make one set of provisions for the temporarily-settled estates, and another set for the revenue-free estates mixed up in them, and for the permanently-settled estates. Some points in which amendment of the Orissa Tenancy Act is desirable are mentioned at the end of this review.

9. Peculiar statuses flourish in the soil of Orissa, and many which are not mentioned in the Act were found in the records of the last settlement, and also were found recognized in the locality in places where there had been no previous settlement. By the rules drawn up by Mr. Toplis the statuses in the former were condensed into the essential words required to show in which class of tenants recognized by the Tenancy Act each particular tenant falls, and no more; the same was also done for tenants in the permanently-settled estates. Thus to give one example, *pahi-shtitiban* and *thani shtitiban* tenants were all classed as *shtitiban*. There are certain different classes of sub-proprietors, but every one who is a sub-proprietor has been shown as such, the English word "sub-proprietor" being used for the purpose.

10. *Agriculture and economic condition (Chapters II and III)*—The census of 1931 shows an increase of population in the three districts of 5.6 per cent over the population of 1901. Making allowances for the difference in the areas covered by this settlement and previous settlements, it appears

that the total cultivated area has increased roughly in the same proportion, namely by 6 per cent in Cuttack, 9 per cent in Balasore and $4\frac{1}{2}$ per cent in Puri. The proportion of rice land has increased from 88 to 93 per cent, and the twice-cropped area has increased from 8 to 11 per cent. Catch crops are rarely grown after the winter paddy in Orissa as they are in Bihar, and the Oriya cultivator is conservative, but there seems to be room for an increase in the twice-cropped area, for *rabi* crops will grow and are frequently grown in the years of flood when paddy crops have been washed away. There has been a marked increase in the area under valuable crops such as jute, sugarcane and *pan*, though the area is still small.

11. It is difficult to compare the prosperity of the Oriya *raiya* since the recent heavy fall in prices which began in 1930, with his position at the time of the last settlement, when prices were much the same at the headquarters bazars as they are now. It is unfortunate that the fall in prices took place immediately after the rents had been increased, but the statistics collected before and during the rent settlement show that there had been a marked increase in the importation of articles such as kerosine oil, tobacco, and sugar. The consumption of opium was about the same as at the last settlement in spite of the enormous increase in prices, and the revenue from it went up from Rs. 6 lakhs in 1901 to Rs. $19\frac{1}{2}$ lakhs in 1928-29. There was thus more purchasing power than there was at the Provincial Settlement. The usual statistics of the sale of *raiya* holdings during the 12 years prior to attestation were collected, and these show that the average price of an acre of *raiya* land had gone up from Rs. 58 to Rs. 103 in Cuttack, from Rs. 44 to Rs. 64 in Balasore and from Rs. 69 to Rs. 98 in Puri, as compared with the 10 years before the revision settlement of 1912. A great deal of money comes into Orissa by money-orders from those who emigrate to work in Bengal and elsewhere. The average receipts of money-orders in the three districts together amounted to Rs. 114 lakhs a year in the five years up to 1930,

12. *Labourers*.—The Oriyas freely emigrate to find work in Bengal, and I have heard the economic poverty of the Oriya *raiya* pleaded on the somewhat circular argument that economic stress had reduced a number of *raiya*s to mere labourers; that these had been forced to emigrate in large numbers to obtain a livelihood; and that therefore the cultivators that remained were hard hit by the scarcity of labour. Careful enquiries were made as to the terms on which labourers are retained, and there is no system of life-long bondage like that of the *kamia* in Chota Nagpur.

13. *Reserved land*.—In the temporarily-settled estates the policy of the last revenue settlement was continued, of getting the landlords to agree to the reservation of a portion of the land, generally about five per cent, for grazing and other purposes. In the previous revision settlement friction had been caused by the somewhat indiscriminate recording of such land as *sarbasadharan*, irrespective of the landlord's consent. In the present settlement, therefore, the question was carefully gone into. In the ordinary waste land in a village in Orissa the tenants have the right to graze so long as it is waste, but so long as he has not agreed to reserve it the landlord has the right to let it out for cultivation. The word *sarbasadharan* has therefore, been reserved for roads, cremation grounds, etc, in which it was held that the tenants or public had rights irrespective of the landlord's consent; while grazing grounds and tanks were recorded as reserved (*rakhit*) only if the landlord (proprietor or sub-proprietor) consented to reserve them as such. The reserved plots were specifically shown in the maps and mentioned in the revenue *kabuliats*. Income from trees or fisheries in reserved lands and tanks was exempted from revenue assessment. Over five per cent of the area has been reserved in this way.

14. Hundreds of small encroachments were found on the land reserved at the last settlement and were reported to the Collectors, who in many cases took action against the proprietors. Clause 8 of the revenue *kabuliat* embodies a new obligation on the proprietor to report encroachments, and to take action in the courts if required to do so. It is unfortunate that there

is no smaller penalty than cancellation of the *kabuliat* which could be imposed on landlords who knowingly or wilfully allow the reserved land to be cultivated; but action has actually been taken in one case to cancel the *kabuliat*. At one time it was proposed that under the *kabuliats* the Collector should be given power to impose a smaller penalty, a fine, but this was not approved. I agree with the view expressed in Chapter XIV that it would be advantageous if the Collector could be given summary power to eject those who make the encroachments. It is important that a watchful eye should be kept on the reserved lands, if they are to be preserved for future generations.

15. *Boundary disputes (Chapter V)*—There were several boundary disputes with neighbouring States, which were decided by the Settlement Officer as Boundary Commissioner, and the boundary demarcated. There should, I think, be no room for actual disputes in any part of the boundary in future. Boundary disputes between villages were few, as the survey was mainly a revision survey, and the last settlement boundaries are taken as authoritative. Trivial alterations were made in the boundaries shewn in the last settlement maps, if it was found that they were incorrect and if the parties agreed; if the alteration was more than a chain no change was made except after regular proceedings, and then only if the parties agreed that the old map was wrong.

16. *Rent settlement (Chapter VI)*—*Temporarily-settled estates.*—Attempts were made in Orissa at the previous settlement to settle rents by classifying the land. This was found impossible, and eventually rent settlement was done by accepting certain classes of competition rents as fair, and using them as a standard. Rents remained practically unchanged after that settlement until the present settlement. The method to be adopted and the amount of enhancement to be aimed at in the present settlement was the subject of discussion between the Director of Land Records and Surveys, Mr. Hubback, Mr. Toplis and myself during a tour in January 1924. It was clear that an attempt to classify the land and fix rates for the different classes was as impracticable and unnecessary as in the last settlement and that the most suitable method would be an enhancement on the ground of rise in prices. Actually the rise in prices would have legally justified an enhancement of 9 to 10 annas per rupee, but the general rate of enhancement proposed was four annas in the rupee. Mr. Hubback submitted proposals to the Board on these lines, which were ultimately approved by Government. Special provisions had of course to be made for rents of tenure-holders and *bajyafidars* and other special classes.

17. In practice four annas in the rupee was taken as the standard enhancement for rents of settled *raiya*s which had remained unaltered since the last settlement. Usually, but not always, all rents of settled *raiya*s in a given village were enhanced by the same number of annas per rupee. The enhancement to be allowed was fixed after taking into consideration the average rate of rent in the village, fertility, liability to flood or drought, the selling prices of *raiya* land, and the rate of rent of recent settlements in the village. The uniformity of selling price in villages which are similar in quality is remarkable, and affords a good index to the relative incidence of a fair rent. These factors were drawn up in a statement by the attestation officer for each village, who proposed a certain rate of enhancement; the proposal was examined by the Charge Officer and orders passed by the Settlement officer. But it was continually impressed upon every officer who was later deputed to do the actual settlement that he was responsible to see that the rents settled were fair, and if he considered that it was desirable to modify the rate of enhancement it was his duty to bring it to the notice of the Settlement Officer. In this way many of the proposals were subsequently modified. I deal with this point at length because I have always found it of great importance to see that rules and orders issued for the settlement of rents are not too rigid, and there must be a certain amount of discretion left to the officer who actually settles rents if he is to settle rents which he considers fair. The orders which were originally passed by Government for settlement of fair rents in Puri, as described by Mr. Dalziel in paragraph 271.

laid down that a map should be prepared of flooded areas, and that in those villages no enhancement should be given. It was pointed out that it was impossible to treat the matter simply as a geographical one, or to tell whether floods in a particular village were sufficiently frequent to be injurious without considering all the factors described above, and that the orders gave no discretion to the Settlement Officer to take such factors into consideration. The orders were subsequently modified.

18. As a matter of fact floods are not necessarily injurious except in areas where they recur very frequently. There are some areas in Orissa which go under water almost every year, e. g., near the Salandi river in Bhadrak. In such places rents are low; land sells for barely Rs. 20 per acre, and as a rule no enhancement was allowed. The map accompanying the report embodies the results of the detailed inquiries made in the settlement. The Orissa Flood Committee's report was not published until the rent settlement was nearing completion, and the rents were settled on the assumption that conditions would remain much as they were in the past.

19. Rent settlement was done in 8,452 villages. Less than the normal enhancement was given in 1,809 villages, and more than the normal enhancement was given in 431 villages, while in the rest the normal enhancement of four annas per rupee was given. It can safely be said that full consideration was given to floods and other injurious or beneficial factors. Objections to the rents were few (only about 6 per thousand tenancies). The average rate of rent in the temporarily-settled estates in the three districts now comes to Rs. 2-12-0 per acre. Before the settlement it was about Rs. 2-4-0 per acre. The average rate in Cuttack is much higher than in Puri or Balasore, a large area being irrigated and protected.

20. The rents of *bajyastidars* and other privileged tenants were enhanced by about 50 per cent, but their rents are still far below those of the ordinary raiyats and amount to only Rs. 1-9-0 per acre. They were in fact limited to two-thirds of the village rate.

21. *Landlords and tenants in temporarily-settled estates.*—In general the relation between the landlords and tenants in the temporarily-settled estates is fair. Exceptions are found in the Rattan and Uttikan estates in Cuttack, and the Kothar estate in Balasore, described by Mr. Dalziel in paragraphs 211, 213 and 259 of his report. A very common complaint was that the landlords take more than the legal fee on mutations; frequently six annas in the rupee, and sometimes more. The common method is to postpone the giving of consent until the period of one year has elapsed, and then to demand more than the legal fee. To help the landlords and tenants to understand the settlement procedure, and their legal rights, a small book was written in Oriya by Babu S. C. Banerjee, Assistant Settlement Officer, and sold with the approval of the Settlement Officer in the camps. Rent receipts are still generally not given for produce rents,

22. *Rent settlement in permanently-settled estates.*—The average existing rent was about Rs. 2 per acre in the permanently-settled estates and about Rs. 2-6-6 in the petty revenue-free estates. Rents were settled under section 128 when the proprietor applied for it, but, as the report shows, in Sukinda, Kanika, Kalkala, and the Ekhrajat estate, extensive use was made of sections 136 and 137 under which rents were settled by compromise. Thereby a great deal of time and money and litigation was saved, with correspondingly less danger to the relations between landlord and tenant. The Settlement Officer has power under the law to prevent section 137 from being used unfairly.

23. *Crop-cutting experiments.*—The average outturn found as the result of several thousand crop-cutting experiments on winter rice, after allowing for ridges and dryage, is 16½ munds per acre in Cuttack, 13½ in Balasore, and 13½ in Puri Sadr. These experiments were conducted in plots selected by the officers as average plots, over many years. The experiments by the random sampling method gave much higher figures, as shewn in Appendix X-A. At present prices it may be said that the rent absorbs on the average one-seventh or one-eighth of the gross produce, excluding the straw.

24. For comparison, I give figures from other recent settlement reports—

	Average rent.			Average outturn (paddy).
	Rs.	a.	p.	
Saran (paragraphs 58 and 94) ...	4	7	0	9½ to 16½ maunds in different thanas.
Champaran (paragraphs 164 and 169)...	2	2	6	10 to 18 maunds in different thanas (generally 15)

It is difficult to compare with Chota Nagpur districts, owing to the system of classification of the land; but in Ranchi the proportionate rent on second class land, which is generally estimated to produce about 16 maunds per acre, was as a rule about Re. 1-4-0 at the last settlement.

25. Per head of the total population in each district, the nett cultivated area works out at about six-tenths of an acre in Cuttack, nine-tenths of an acre in Balasore, and three-quarters of an acre in Puri. There is clearly not much room for an increase in the population, except in the few places where there is room for an increase of cultivation. The high average fertility and density of population in Cuttack is of course influenced by the large area irrigated and protected. About 5.7 per cent of the cultivated area has been recorded as *nijot* of the landlords, and 4.5 per cent as *nijchas* in the temporarily-settled estates.

26. *Commutation*—Produce rents are not very common in Orissa, though it must be admitted that a great deal of the land recorded as *nijchas* particularly in the Uttikan and Rattan and Kanika estates, is really held by tenants on produce rent. It is impossible to record tenants who refuse to be recorded. There were 7,266 applications, for commutation, of which 3,500 were disallowed, largely because the applicants were prevailed upon by the landlords to withdraw them. The average rate fixed was nearly Rs. 3-4-0 per acre in Balasore and just over Rs. 6 per acre in Cuttack.

27. *Revenue Settlement (Chapter VII.)*—The main principles of the revenue settlement were prepared in 1925, and were approved by Government in 1926. The settlement runs in all cases up to 1957. As at the last settlement, 50 to 55 per cent was laid down as the normal percentage to be taken as revenue. A proposal to value *nijchas* and *nijot* at a rate higher than the village rate was fully considered; it was pointed out that in that case it would be necessary to modify the assessment in the case of large numbers of small proprietors who were little more than *raiya*s; and Mr. Murphy observed that there was no reason to charge the proprietors more heavily to revenue if they chose to keep a reasonable proportion of their lands in their own possession. The proposal was therefore eventually dropped. The proprietors also got the full benefit of mutation fees which they are allowed to charge on transfers. These were excluded from consideration in calculating the assets, and since the statistics show that the legal fees amount to about 5 per cent of the rental the concession is considerable.

28. Particular attention was paid to the assessment of *sairat*, and under the instructions of Mr. Tuckey, proceedings were drawn up in each village for its assessment. The assessment is much higher than at the last settlement, but is still very moderate.

29. It would have been legitimate to take increased revenue retrospectively from the date of expiry of the previous settlement, in cases where assets had increased by extension of cultivation during the currency of that settlement, but Government decided not to increase the revenue until the new settlement of rents came into force.

30. The question as to whether the Collector's Register D would require rewriting was considered at about the same time. Formerly shares in estates were recorded as an entirely fictitious share in the whole estate, whereas actually the individual might have been in possession of specific villages or

parts of villages. In the present settlement actual possession was recorded. The existing orders of the Board were that whenever Register D was written it should be rewritten in the new form, which shows *mauzawar* possession. It was decided to rewrite the registers in the new form and since all the proprietors have to be summoned for revenue settlement, it was proposed that the settlement department should rewrite the registers at the time of revenue settlement, and this was approved. The *khewats* were taken as authentic information under section 22 of the Land Registration Act, and the procedure laid down in the Act was strictly followed. The registers for the permanently-settled estates were also rewritten by this department. The work was done at small cost, and it would be economical to follow the same practice in all settlements, if rewriting is necessary. It is not known whether the Collector's registers for revenue-free estates are to be rewritten, but if so it is suggested that a combined form for Registers B and D should be adopted, just as Registers A and D have been combined.

31. Revenue settlement began at Balasore in 1927, and proceeded throughout the operations with remarkable smoothness, for which a great deal of credit is due to Mr. Samuel Das and the other Deputy Collectors who conducted it. At first there was a little suspicion of the new method of registration in Register D, but eventually the proprietors appreciated that it represented the true facts better and would enable them to apportion the revenue more fairly among themselves. They realized in fact from the beginning that the old *mahalwar* shares gave no idea of the true facts. All separate accounts had to be closed, but proprietors were given a certain time within which to open fresh ones free of charge. They were given and are given facilities to get copies of the statement of assets of each *mauza*, and a ready reckoner is being prepared in my office for calculating the value of shares, for use in the partition and land registration departments.

32. Much difficulty arose in apportioning the revenue in estates which had been partitioned since attestation, since the partition department's valuation of *nijchas* differs from that adopted in the revenue settlement. It would have been much more convenient for revenue settlement if partition cases had been postponed until the revenue settlement was over, as was constantly urged by the settlement department. As stated in paragraph 166 partition has proceeded very far in Orissa, and there are hundreds of estates with a revenue of less than ten rupees, in spite of the provisions of section 11 of the Partition Act. A proposal to allow proprietors to redeem estates with a revenue of less than one rupee was approved by Government, and 22 estates were so redeemed, at 25 years' purchase. But it is desirable that such small estates should not be created in future partitions. As suggested in paragraph 151, that seems little object in attempting to distinguish *chaukidari* jagirs at any future settlement.

33. In the last settlement, the increase in revenue was mainly brought about by the increase in the assets which had taken place in the previous 60 years, and not by an enhancement of rents at the time of the settlement. This naturally caused difficulty, as the increase in revenue reduced the proprietor's income. This was not the case now, as the increase in assets is mainly due to the settlement of rents. The proprietor's nett income is in fact now 12½ per cent more than it was immediately before the present settlement. The terms on which settlement was given were moderate, and as observed in the report, objections were very few; in the vast majority of cases *kabuliats* were executed without delay. Applications for revision were extremely rare, and even though they were slightly more numerous towards the end on account of the financial depression, there were only 54 in all, of which only 9 were successful.

34. In paragraph 156 Mr. Dalziel has described some objections which were taken to the form of *kabuliat*: some slight amendments were made as a result, but in most cases as explanation of the meaning of the clauses was all that was required.

35. *Satais Hazari Estate* (Paragraph 159).—Much confusion had arisen from the uncertainty of the real status of the Satais Hazari Estate of the Jagannath Temple, in respect of an assignment of revenue from the Rahang Estate in Puri. The estate was gradually establishing itself

as a kind of part proprietor, revenue-free, in that revenue-paying estate, and was collecting part of the rents direct. The real status was cleared up in a case under section 116, and the records now make it clear that the Satais Hazari Estate has no direct concern in the villages at all. Government accepted the proposal that the revenue paid by the Rahang Estate should be at such a rate as would include the assignment, and that the assignment should be paid over by the Collector. This is a satisfactory solution of the difficulties.

36. There are five *Killajat* estates—Mangalpur, Ambo, Balarampur, Ragri and Chausathipara—which were considered in the last settlement to have some claim to permanent settlement. The claim was not upheld, but they were leniently assessed to revenue. In the present settlement the proprietors urged that their position was most insecure because they never knew whether their revenue would not be enhanced up to the full normal proportion of the assets. It was, therefore, proposed by the Settlement Officer, and approved by Government, that the percentage taken as revenue in all settlements now and in the future, should not exceed half the rate taken in ordinary estates, provided the estate remained intact and followed the rule of primogeniture. This gives to the proprietors the sense of security which they desired.

37. *Sub-proprietors*.—Sub-proprietors (3,556 in number) are peculiar to Orissa, and their existence adds to the complications of revenue settlement. The status is highly prized, though actually the proportion of the assets left to the sub-proprietor under the system of revenue settlement is often considerably less than it would be if he were assessed to rent as a tenure-holder. He has, it is true, the advantage of being able to have land as *nijjote*, which the tenure-holder has not, but this is hardly in my opinion sufficient to account for the anxiety of the sub-proprietors to preserve that status; it is really a matter of prestige. The normal percentage of the assets to be allowed to each class of sub-proprietor was laid down at the last settlement, but concessions had frequently to be made. In the present settlement, the percentages were brought more into accordance with the proper proportions. The distinctions between the different classes of sub-proprietors tend to disappear, a tendency which I think is all to the good.

38. *General results of revenue settlement*.—In round figures the total assets at the last settlement of all the temporarily-settled estates in the three districts were Rs. 38,29,000, and the revenue Rs. 20,67,000, or 54 per cent. The assets found existing at the present settlement were Rs. 42,16,000, and as a result of rent settlement increased to Rs. 51,35,000. The revenue settled is Rs. 27,53,000, or 53.6 per cent of the assets. The rents in the *khas mahals* excluding Khurda went up from Rs. 84,000 to Rs. 1,04,000; so that the total increase of revenue was Rs. 7,06,000. The increase secured by agreement in Khurda brings the total increase up to about Rs. 7,50,000.

39. *Cuttack town*.—The town was surveyed on the 64-inch scale, not under the Municipal Survey Act, but as part of the revenue survey and settlement. Disputes were very numerous, statuses were very involved and the work slow. In the temporarily-settled estates rent was settled in the ordinary way for those tenancies which came under the Tenancy Act; in the case of those governed by the Transfer of Property Act they were left untouched. There has been a great rise in property value, and a correspondingly large increase in the revenue of the estates falling in the town. The ultimate enhancement in the rents settled by the settlement department amounted to 49 per cent. In the cantonment and the *khas mahal* the record-of-rights was completed by the settlement department, and an Assistant Settlement Officer was gazetted as a sub-registrar to register the revised leases in favour of the *khas mahal*; but the record-of-rights was distributed to the tenants, whether they executed the leases or not.

40. *Permanently-settled estates*.—The report deals fully with the large *killas*, with which a permanent settlement was made when the country was taken over from the Marhattas. In the more remote ones which still remain in the family of the original proprietors, personal, almost feudal, relations still persist between the landlord and his tenants; one might almost say his

subjects. These estates have been dealt with at length, as in most of them no record of rights existed before. In Sukinda, which is still largely covered with jungle, the management was found to be haphazard and autocratic, but by no means oppressive. The proprietor attempts to preserve a portion of his forest, and there is much of it which would pay if put under regular reservation under the Forest Act. It is a matter for regret that the proprietor would not agree to do this. The tenants have certain rights of cutting in the unreserved jungle, in return for a certain number of days' labour; but they are not allowed to cut valuable trees such as *sal* and *piasal*. Certain *abwabs* known as *baje kharcha* were collected with the rent; these were amalgamated with the rent by agreement under section 137. No other enhancement was applied for and the resulting rents are moderate; cess was found to be levied at an illegal rate and was cut down. The system is not rigidly exacting, and in spite of the *abwabs* the relations of landlord and tenant remain good. In Kujang the management is reasonable and the relations satisfactory, though there was a big dispute about fisheries. There was no general application for an enhancement of rent. Tenants are allowed to use forest produce on payment of so much per hearth, the payment being made only if the produce is required. In Kalkala and Chhedra relations are satisfactory.

41. In Harishpur the landlords are absentees, and the relations between the agents and the tenants are not good. It was noticeable that in the adjacent estate of Bishnupur (in which this was not the first settlement as it was in Harishpur), the tenants were more advanced and aware of their proper rights. Marichpur has also passed into the hands of several co-sharer proprietors, and the management is not well organized but is not oppressive. Much of Aul is badly affected by floods, but it was noticeable that even inside the ring-bundh, the settlement costs were paid up by the tenants without any delay. Large numbers of people go from this estate and work in Calcutta. Scores of holdings were shewn in the books and even in the last settlement records as service holdings, and it was claimed that the holders were liable to dismissal by the estate. The proper status was the matter of careful enquiry in each case, and many of them were found to be settled *rai-yats*. The relation with the landlord are not good, and the estate still realizes a large income from penalties imposed on social delinquents. The Ekhrayat Estate, formerly part of Khurda, is now a revenue-free estate of the Jagannath Temple at Puri. Relations with the management are on the whole good, and rents were enhanced by compromise under section 137. In Patia the relations between landlord and tenant are strained. The estate has passed gradually, and now entirely, out of the hands of the former proprietor.

42. In Kanika the strained relations between landlord and tenant gave the most trouble throughout the settlement. The management is highly organized; records are well kept and the books in perfect order. But fees of many kinds are conspicuous in the accounts, such as penal rent, damages, pasturage fees, *khala kar* (for use of waste land as threshing floors, etc.) *amin* fees, searching fees, copying fees, notice fees, fees for mutation of names of heirs as well as for mutations of transfers, and fees for correction of areas in the books. Thus the cost of maintaining the books is really borne by the tenants.

43. For transfers the mutation fee is usually four annas in the rupee on the valuation fixed by the estate for land in the particular village, but if the transfer was affected by registered deed the fee was six annas in the rupee. It was claimed that the public had no right of way over any roads in the estate, but it was often found that tenants whose land had been used for the purpose of making certain roads had got compensation at a lower rate than the valuation fixed for the purpose of mutation fees or transfers, and no reduction of rent. The rights of way were in many cases contested under section 116 and were generally found to exist. In Balasore one of the main bones of contention was the levying of forest cess from all tenants at half an anna per rupee of rent, the *rai-yats* stating that the jungles were so far away that they got nothing for it. It was commonly found that the land of tenants who did not pay their rents was resumed by the estate, and the

manager stated that this had occurred in some hundreds of acres near Motto. The tenants stated that they were hindered from going to the ordinary courts for settlement of their own disputes.

44. In the attempt to compromise (mentioned in para. 307) all the main matters of dispute were taken into consideration, and terms of compromise were actually drawn up before me. Unfortunately although the terms were agreed to, something or other occurred as a result of which the compromise was never actually filed. In Cuttack there was an enhancement of rent in 1916, and where it did not exceed two annas per rupee this became legalized by three years' payment. In some cases the enhancement exceeded two annas per rupee, and was therefore not attested; but the enhancement was usually restored by compromises under section 137.

45. *Cost of the settlement (Chapter XIII).*—The gross cost of the settlement, including leave and pension contribution and other indirect charges, but excluding the expenditure on registration of *kabuliats* in Khurda, amounted to Rs. 62,99,234. Including Khurda it cost Rs. 63,31,641. The nett cost after deducting miscellaneous receipts such as remeasurement fees, court-fees, etc. amounted to Rs. 56,05,326. Out of this Rs. 11,93,803 was spent in the permanently-settled and revenue-free estates. Government contributed a portion of this as usual in the areas which were being settled for the first time, and the balance was recovered from the landlords and tenants; the total recovery being Rs. 12,34,169. The remainder, viz. Rs. 42,85,389 was therefore the nett cost of the settlement in the temporarily-settled estates. The nett costs works out at Rs. 893 per square mile against Rs. 634 at the provincial Settlement. The cost of everything has gone up considerably since that date and moreover the number of plots has increased, and settlement cost depend much more on the number of plots than on the area. The number of plots to the acre in Orissa is about 3 and the gross cost rate per hundred plots is Rs. 55. while the nett cost rate is Rs. 49. In Manbhum the gross rate was Rs. 56 and the nett cost rate Rs. 51. In Ranchi the nett cost rate per 100 plots has now come down to about Rs. 40 to Rs. 45.

46. Several factors have to be recognized as peculiar to the Orissa Settlement, such as the enervating climate, which reduces the outturn of the Oriya staff; the extreme subdivision of holdings; the complications in the statuses and the difference in the legal procedure in the permanently-settled and temporarily-settled estates; the fact that in the temporarily-settled estates all the objections made before the final publication are made free of court-fees, which not only increases the number, but reduces the receipts in the shape of court-fees; the settlement of rents for two million tenancies in the temporarily-settled estates; the settlement of revenue for 11, 000 *tauzis*, and the rewriting of the whole of the Collector's Register D. The general settlement of rents and revenue alone adds considerably to the cost in temporarily-settled estates, and to compare with the cost in permanently-settled districts some lakhs would have to be deducted on this account.

47. I agree with Mr. Dalziel's remarks in Chapter V that the essential thing is to get the record into an accurate form at the earliest possible stage and to reduce the checks and processes at the later stage. One factor which always kept the work rather slow in Orissa was the apathy of the people at the early stages of survey and *khanapuri*. This persisted in spite of all efforts to secure their attendance; the difference between the attendance at *khanapuri* in Orissa and in other parts of the province is most marked. The result was that the attestation disputes were nearly always more than the number of disputes at *khanapuri*, and remeasurement fees paid by people who were not satisfied that their fields had been correctly surveyed at *khanapuri*, amounted in all to over 1½ lakhs of rupees. The fact that objections after draft publication are free in a revenue settlement also led to the unusual result that the number of such objections was higher again than the number of attestation disputes. The total number of such objections was 226,000 or about 2 per cent of the number of plots.

48. The Act provides another opportunity to object to entries in the record, namely under section 123. There were 79,000 such cases, of which

only 12, 681 were actually concerned with the fairness of the settled rent. The Act requires amendment, so as to confine these objections to questions of rent.

49. As described in the report some of the customary processes of settlement were modified or cut out as time went on. Suggestions for improvement or economy were systematically encouraged by the offer of rewards, and many of the suggestions led to useful results, including even the abolition of certain posts. The amount of reference to and comparison with the last settlement record was gradually reduced. Where comparison had to be made (e.g. of revenue-free or privileged land) it was done carefully at the earliest possible stage; the *terij* and rent schedule prepared in recess, mainly for the detection of illegal enhancements, was considered to be not worth the time spent on it and abolished. The statutory rules were modified in two respects which considerably reduced the time spent in rent settlement. The processes of survey and *khanapuri* were separated in the last two years, as is done in original settlement, and, attention being concentrated on one thing at a time, I think the work was better done. The *janch* of the records after rent settlement was cut down to the minimum. The traditional process known as *moaina*, which is an examination of the record after fair copying, was held to be an illogical time to examine the record, which should be in perfect order before it is fair copied, and *moaina* was reduced to a mere comparison with the draft. A change introduced in the last year in the manner of putting up for orders the mistakes found in recess, caused a very substantial saving of time.

50. Improvements in the mere forms used, particularly the combination of the area slip and *parcha* into one, and reductions in size in other forms, resulted in realized savings of several thousands of rupees in the cost of forms alone, and more in time. The process of simplification has been carried still further in Ranchi as a result of a conference of all the Settlement Officers in 1929. In particular the opportunity for raising disputes has been reduced by a modification in the statutory rules, so that a dispute decided at *khanapuri* cannot be re-opened at attestation. This also came into effect in the last *khanapuri* year of the Orissa Settlement. The entry of areas in acres and decimals only familiarizes the people with a standard system of measurement (para. 94); and the dropping of preliminary *khewat* writing (para. 93) is an improvement.

51. *Tenancy law*.—In Chapter XIV, Mr. Dalziel deals with the working of the tenancy law. I only deal with some of the main points. I agree with his remarks in paragraph 436 that the people have hardly yet got used to the idea that occupancy rights can accrue to those holding on produce rent; in fact the settlement came as a surprise to many in this respect. But I think that the landlord is already sufficiently well able under the law to protect his *nijjot* if he wants to do so.

52. The subdivision of sub-proprietary tenures by civil courts has caused great difficulty, as described in paragraphs 438 and 449, since they were made without any relation to the revenue partitions of the estates themselves. It is difficult to see any remedy, unless partitions of sub-proprietary tenures were, by legislation, placed solely under the revenue courts.

53. There is no doubt that the statutory provision for the fee for mutation of transfers equal to one quarter of the consideration money in the temporarily-settled estates, encouraged landlords in temporarily-settled and permanently-settled estates as well to put their fees up to that amount. The matter should now certainly be regulated by law in both classes of estates. The present provision does not work well even where it is in force, and amendment is required. Various suggestions have been made, of which space forbids a discussion.

54. As regards appointment of common managers, there seems no reason to place the power in the hands of the Collector in respect of sub-proprietors, any more than in respect of proprietors. Similar arguments apply, though in different degrees, to both cases.

55. As regards the removal of embankments, it has already been stated that the rents were settled on the assumption that existing conditions would be substantially maintained.

56. The question whether the towns should be excluded from the operation of the Act raises a difficult question, as to how far exactly the Act does already apply in the towns, a question which it is perhaps better to leave alone. Personally I think it is not altogether inconvenient that the Act does, unlike the other Tenancy Acts, provide a status (*chandna*) which is applicable to urban tenants, and makes their rents liable to enhancement by the revenue authorities and no one else.

57. I have already remarked on the necessity for amending section 123 so as to confine it to questions of rent only. This applies to section 104-E of the Bengal Tenancy Act also.

58. In the greater part of Orissa rights in trees were not a matter of serious dispute, and as a rule detailed notes of possession were not entered in the *khatians*. A note of such possession was, however, made where any one other than the landlord and tenant of the plot concerned had any right in the trees. Rights in jungle were recorded in the village notes; but I must agree that it would have been better in some parts to have a regular forest *khatian*, as in Chota Nagpur (para. 121).

59. I do not agree with the proposal to allow the landlord to charge special rents for special crops, as it would be contrary to the spirit of the Tenancy Act. In some cases special rents have been recorded for *pan* gardens, as these do alter the agricultural nature of the holding.

60. The question of reserved land has already been mentioned above. In the permanently-settled estates. I doubt if any action could be taken against any one encroaching, except by the proprietor himself. In the temporarily-settled estates there is some consideration for the reservation, in the fact that any income derived from the plots (fishery income, or income from trees) is exempted from revenue assessment. This argument does not apply in the permanently-settled estates.

61. I hold the view that the servants of the community, who have been recorded as *deshheta jagirs*, are not liable to ejectment from their holdings at the will of the landlord; and I understand that this view has recently been upheld by the Civil Court in a case under section 130.

62. In my opinion the most important amendments required are with regard to transfers. Secondly, the reason which existed at the time of the passing of the existing Act for excluding the permanently-settled estates from some of its provisions, no longer exists, and they should be brought more into line with the temporarily-settled estates.

63. As has been done in other settlements, some of the important correspondence relating to the settlement is being printed, for reference by officers who have to deal with the report, but not for sale to the public.

64. I endorse the remarks of Mr. Dalziel as to the officers who worked under him, and those who were promoted or received titles for their good work, and as to the acknowledgments due to Messrs. Hubback and Tuckey as Directors of Land Records. I would add that much was due to Mr. Toplis, who started the settlement on sound lines. As to the period before Mr. Dalziel took charge, much is due to the good work done by Mr. Reuben and Rai Sahib Phanindra Nath Gupta, as both Charge Officer and Settlement Officer, and by Mr. Senapati and Babu Nalini Kanta Ghosh. Throughout a long period as Charge Officer and Settlement Officer, the sound judgment of Mr. Scotland was of great value, while the success of the revenue settlement is due in a very large measure to Mr. Samuel Das, who brought the operations to a close as Settlement Officer. In conclusion, Mr. Dalziel himself has done good work during a period of nearly four years as Charge Officer and Settlement Officer, and has written a comprehensive final report which should be of great value.

I have the honour to be,

SIR,

Your most obedient servant,

P. T. MANSFIELD,

Director of Land Records and Surveys.

FROM

KHAN BAHADUR SHAMS-UD-DIN HAIDAR, O.B.E.
SECRETARY TO THE BOARD OF REVENUE,
BIHAR AND ORISSA.

To

THE SECRETARY TO THE GOVERNMENT OF
BIHAR AND ORISSA, REVENUE DEPARTMENT.

Dated Patna, the 8th. February 1934.

SIR,

I AM directed to submit the Final Report on the Orissa Settlement by Mr. W. W. Dalziel, I.C.S.

2. This is the third regular revenue settlement of Orissa, based on a detailed examination of the assets, though there had previously been a number of short-term settlements of a summary character, in which the assets were roughly estimated, and attention seems to have been largely directed to dealing with claims to hold revenue-free. The history of these settlements is to be found in previous reports and the present report goes but lightly over the same ground again. The first regular settlement was made by the Government of the East India Company and lasted, owing to the intervention of the Orissa famine, for 60 years. The second, known as the provincial settlement, was conducted under the direction of the Government of Bengal; there was then a revision of the record-of-rights, undertaken chiefly in connection with the now abandoned scheme of maintaining the record and finally the present operations conducted under the direction of the Government of Bihar and Orissa. Apart from the importance of the present operations as a settlement of revenue, this full and careful examination of the working of local customs and tenancy laws, undertaken at a moment when Orissa is about to take her future into her own keep, should be of great value to the administration who will be responsible for the welfare of her people and the next settlement of revenue. The work is now complete. The operations covered nearly the whole of the three coastal districts Cuttack, Puri and Balasore, excluding only those areas where the record-of-rights is comparatively recent;—and there is now an up-to-date record for all parts, some of which obtain a record and others a legally authoritative record for the first time.

3. Chapter II deals with population and the material condition of the people and chapter III with agriculture, floods and the canal system. In these chapters the Settlement Officer has endeavoured to supplement, rather than to supersede, the full description of the country and its people contained in the report of Mr. Maddox and later reviewed by Mr. James. Other material was also at his disposal, in addition to the enquiries of the settlement staff, such as the results of the recent census, the Provincial Banking Enquiry Report, the Flood Committee's Report, and the work of the Agricultural Department on the special problems of the area. The opportunity appears exceptional for a comprehensive review of the economic development of last forty years, but this is neutralised by the fact that, while the recent fall in prices receives mention, the discussion is based entirely on statistics compiled before the agricultural depression set in. Much of it must be already out of date. For instance, Mr. Maddox had noticed that wages, as is usual, had lagged behind the rise in prices, and wages were found to have remained constant up till the time of the revision settlement, but after that rose till 1924 and since then, the present report states, have remained at the same level. In spite of the normal lag of wages behind prices, it is difficult to believe that they have not fallen by now. Then again the recent increase in cash-crops such as jute and paddy, which is noticed in the report, can hardly have been maintained in the face

of the slump in trade and the decreased purchasing power of the people. In his covering letter the Director of Land Records and Surveys observes that it is difficult to compare the prosperity of the Oriya raiyat now, since the fall of prices in 1930, with his position at the time of last settlement when prices at the headquarters bazars were much the same as they are now. In fact the report, while noticing certain comparative figures, makes no attempt to do it. The flood problem is considered generally in these chapters, and more particularly in the chapters dealing with each district. Briefly, at certain seasons the natural drainage system of the country is unable to deal with the water entering the deltaic tract from the uplands of the Orissa Feudatory States and of Chota Nagpur, and this defect is aggravated by local attempts at protection by means of embankments. While this is a big factor in the economy of Orissa, it is not one with which a settlement report can deal. The isolation of Orissa seems to be breaking down to a certain extent, and the same social and economic tendencies are noticed there as exist elsewhere, but in a less marked and developed form.

4. A record-of-rights has been prepared for 6,278 square miles. Fair rents have been settled over approximately the same area, while about two-thirds of it consists of temporarily-settled estates in which there was also a settlement of revenue. For an area of 723 square miles original survey has been done, and a record-of-rights has been prepared for the first time for 1,261 square miles. The rest of the work was revision. The operations included three districts and the report deals in a separate chapter with each of these in addition to the general chapters. The difficulties at the outset were great. The staff were inexperienced, and many of the competent members of it ignorant of the language. The programme was too large even for a fully trained staff. The climate is unhealthy and as camps often lasted right through the rains, it is not a matter for surprise that casualties from sickness were heavy, nor that this reacted on the morale of the staff and led to unusually large number of dismissals and many convictions for malpractices. It is creditable to those immediately responsible for the operations that the difficulties were gradually overcome and that the general quality of the work was good. The gross cost of the operations was Rs. 62,99,234 and the net cost after deducting miscellaneous receipts was Rs. 56,05,326. As most of the area consists of temporarily-settled estates subject to a revenue settlement, the greater part of this cost fell on Government. The cost of the work is examined in Chapter XIII of the report and by the Director of Land Records and Surveys. The cost works out considerably higher than that of the provincial settlement of Orissa. For various reasons it cannot be profitably compared with the cost elsewhere. The comparatively high cost is explained by several factors, some peculiar to Orissa, others to the conditions in which the operations were begun.

5. Chapter V of the report is concerned in the main with certain technical aspects of settlement work, and is of more interest and value to a settlement officer than to the general reader. One or two points are of wide interest. The Director of Land Records and Surveys observes that owing to the small size of plots, it will probably be necessary to employ a larger scale than 16" = 1 mile extensively in the maps of future settlement. Successful attempts were made to introduce more simple and less expensive methods of procedure, and the Settlement Officer's view that improvement must mainly be sought in the simplification of the processes leading up to draft publication deserves attention. A matter that certainly demands a remedy is the right of the parties to reopen, by way of objection to the settlement rent roll, disputes that have no connection with the fair rent and have already been decided at previous stages. It is recorded that more than five-sixths of the disputes decided under section 123, Orissa Tenancy Act, were of this character. The same criticism applies to the corresponding section of the Bengal Tenancy Act and has been noticed in other settlement reports.

6. The chapter on the record-of-rights deals mainly with the many curious forms of tenancy status found in Orissa. The present report perhaps adds little to the information to be found in the full examination of the matter by Mr. Maddox, nor have any substantial changes been made. Such change

as there has been is in the direction of simplification, since it has been considered sufficient to describe each status by the term necessary to relegate the tenant to his particular class under the Orissa Tenancy Act, ignoring minor distinctions which have no legal significance. The peculiar classes of sub-proprietors are discussed and it is noted that distinctions between these are tending to disappear. The High Court has, however, felt bound to recognize the distinction between *maurasi* and *miadi sarbarakars*, but has left to the revenue authorities a means by which the latter can be allowed to enjoy the privileges which have lasted for at least 90 years. The Board in a recent decision has decided to continue them for the period of the present settlement, and the position has been further challenged by the proprietor. A status, the incidents of which appear to be still unsettled, is *chandna*, which is regulated by local custom and usage. The courts in Jajpur are holding that the *chandnadar* in spite of his fixity of rent is a mere tenant-at-will, which is anomalous.

7. *Landlord and tenant—the right of transfer.*—In the temporarily-settled area the relation between landlord and tenant, except in a few estates, has been found to be good. In some of the permanently-settled estates, relations are still in a large degree feudal and personal, but while arbitrary, are not ordinarily oppressive. In some of the estates, however, there is friction arising from bad management and the survival of autocratic rule; in one estate in particular it is noted that the management is highly efficient but very oppressive. Illegal *abwabs* of large amount are found in some of these permanently-settled estates. One of the most vexed questions between landlord and tenant is the right of transfer. In the temporarily-settled area this is governed by law and in the permanently-settled area by custom. In the latter the consent of the landlord is usually required to the transfer of rent-paying lands, and the normal fee is 25 per cent of the consideration money, though in one or two cases higher fees are mentioned. It seems clear, however, that the law is indirectly tending to fix the fee even in areas to which it does not apply, and in some cases has resulted in raising it substantially (paragraphs 318, 355 and 416 of report). Section 31 has been held to apply to the Ekrajat mahal, and the fee here in consequence has also been much increased. This is one result of legislating about mutation fees which deserves consideration.

8. The law relating to the realization of transfer fees in the temporarily-settled estates is reported to be defective. The subject is a very thorny one, and cannot be discussed here. It may, however, be noted with satisfaction that the effect of granting a considerable degree of freedom of transfer has not been, as many feared, a marked incursion of tenants without agricultural aptitude.

9. The Board is inclined to agree that the landlord himself should be liable for neglect by an agent to deliver proper rent receipts, a provision which finds place in the Chota Nagpur Tenancy Act and does no more than place on the landlord a responsibility which he should be called upon to bear. The Board notes with interest the view of Mr. Dalziel that the limitation of suits for produce rent has been effective in saving the tenants from harassment. It is to be hoped that the enactment of the same period of limitation for Bihar will have the same result.

10. The problem of pasture land is growing more and more acute in the Orissa coast districts. It appears to be now too late, if indeed it was ever practicable and economically desirable, to reserve in each group of villages a sufficient area to allow the plough cattle to subsist mainly by grazing. But it is satisfactory to find that steps have been taken to safeguard to a much greater degree than heretofore the village common lands available for exercising the cattle. The position is however, by no means fully secured and it would seem that legislation is required to provide some lesser penalty than the very drastic one of cancelling a revenue settlement against a landlord who prefers his private advantage to the needs of the community from whom he draws his income.

11. There are several other points put forward by Mr. Dalziel and the Director of Land Records; Mr. Mansfield, to which careful attention should be given when the Orissa Tenancy Act is examined with a view to its amendment.

But since it is unlikely that this will be done until Orissa has her own legislature, there is little advantage in further expression of opinion at the moment. It is fortunate that the later stages of the settlement were under the direction of, and the review of this report was written by, an officer of Mr. Mansfield's sound judgment supplemented by experience of the problems of the settlement from almost its earliest stages. To him the Board thinks a large share of the credit for the success of this difficult operation should be assigned. Mr. Toplis started it on sound lines in circumstances which imposed a severe tax on his patience and a heavy strain on his physical energy. Messrs. Scotland, Reuben and Rai Sahib Phanindra Nath Gupta, both in subordinate and in superior charge, worthily maintained the reputation for zeal, thoroughness and fairness to all parties, which the public has learnt to assume as characteristic of officers employed on settlements in this province. Mr. Senapati and Babu Nalini Kanta Ghosh did first class work as Charge Officers, and Mr. Samuel Das especially distinguished himself in the difficult task of revenue settlement. The Board particularly commends the services of Mr. Dalziel himself, who has written a succinct and yet very valuable report on the operations which have now been brought to a successful close. The future Government of Orissa is fortunate in succeeding to the labours of these and the very many other deserving officers, whose work has enabled the new province to start with an up-to-date record of the rights of all persons having interest in the lands of the three coastal districts, and a full appreciation of the tenancy problems, which will no doubt come under review at an early date after the inception of the province.

I have the honour to be,

SIR,

Your most obedient servant,

S. HAIDAR,

Secretary.

FROM

KHAN BAHADUR SHAMS-UD-DIN HAIDAR, O.B.E.
SECRETARY TO THE BOARD OF REVENUE,
BIHAR AND ORISSA.

To

THE SECRETARY TO THE GOVERNMENT OF
BIHAR AND ORISSA, REVENUE DEPARTMENT.

Dated Patna, the 8th. February 1934.

SIR,

I AM directed to submit the Final Report on the Orissa Settlement by Mr. W. W. Dalziel, I.C.S.

2. This is the third regular revenue settlement of Orissa, based on a detailed examination of the assets, though there had previously been a number of short-term settlements of a summary character, in which the assets were roughly estimated, and attention seems to have been largely directed to dealing with claims to hold revenue-free. The history of these settlements is to be found in previous reports and the present report goes but lightly over the same ground again. The first regular settlement was made by the Government of the East India Company and lasted, owing to the intervention of the Orissa famine, for 60 years. The second, known as the provincial settlement, was conducted under the direction of the Government of Bengal; there was then a revision of the record-of-rights, undertaken chiefly in connection with the now abandoned scheme of maintaining the record and finally the present operations conducted under the direction of the Government of Bihar and Orissa. Apart from the importance of the present operations as a settlement of revenue, this full and careful examination of the working of local customs and tenancy laws, undertaken at a moment when Orissa is about to take her future into her own keep, should be of great value to the administration who will be responsible for the welfare of her people and the next settlement of revenue. The work is now complete. The operations covered nearly the whole of the three coastal districts Cuttack, Puri and Balasore, excluding only those areas where the record-of-rights is comparatively recent;—and there is now an up-to-date record for all parts, some of which obtain a record and others a legally authoritative record for the first time.

3. Chapter II deals with population and the material condition of the people and chapter III with agriculture, floods and the canal system. In these chapters the Settlement Officer has endeavoured to supplement, rather than to supersede, the full description of the country and its people contained in the report of Mr. Maddox and later reviewed by Mr. James. Other material was also at his disposal, in addition to the enquiries of the settlement staff, such as the results of the recent census, the Provincial Banking Enquiry Report, the Flood Committee's Report, and the work of the Agricultural Department on the special problems of the area. The opportunity appears exceptional for a comprehensive review of the economic development of last forty years, but this is neutralised by the fact that, while the recent fall in prices receives mention, the discussion is based entirely on statistics compiled before the agricultural depression set in. Much of it must be already out of date. For instance, Mr. Maddox had noticed that wages, as is usual, had lagged behind the rise in prices, and wages were found to have remained constant up till the time of the revision settlement, but after that rose till 1924 and since then, the present report states, have remained at the same level. In spite of the normal lag of wages behind prices, it is difficult to believe that they have not fallen by now. Then again the recent increase in cash-crops such as jute and paddy, which is noticed in the report, can hardly have been maintained in the face

of the slump in trade and the decreased purchasing power of the people. In his covering letter the Director of Land Records and Surveys observes that it is difficult to compare the prosperity of the Oriya raiyat now, since the fall of prices in 1930, with his position at the time of last settlement when prices at the headquarters bazars were much the same as they are now. In fact the report, while noticing certain comparative figures, makes no attempt to do it. The flood problem is considered generally in these chapters, and more particularly in the chapters dealing with each district. Briefly, at certain seasons the natural drainage system of the country is unable to deal with the water entering the deltaic tract from the uplands of the Orissa Feudatory States and of Chota Nagpur, and this defect is aggravated by local attempts at protection by means of embankments. While this is a big factor in the economy of Orissa, it is not one with which a settlement report can deal. The isolation of Orissa seems to be breaking down to a certain extent, and the same social and economic tendencies are noticed there as exist elsewhere, but in a less marked and developed form.

4. A record-of-rights has been prepared for 6,278 square miles. Fair rents have been settled over approximately the same area, while about two-thirds of it consists of temporarily-settled estates in which there was also a settlement of revenue. For an area of 723 square miles original survey has been done, and a record-of-rights has been prepared for the first time for 1,261 square miles. The rest of the work was revision. The operations included three districts and the report deals in a separate chapter with each of these in addition to the general chapters. The difficulties at the outset were great. The staff were inexperienced, and many of the competent members of it ignorant of the language. The programme was too large even for a fully trained staff. The climate is unhealthy and as camps often lasted right through the rains, it is not a matter for surprise that casualties from sickness were heavy, nor that this reacted on the morale of the staff and led to unusually large number of dismissals and many convictions for malpractices. It is creditable to those immediately responsible for the operations that the difficulties were gradually overcome and that the general quality of the work was good. The gross cost of the operations was Rs. 62,99,234 and the net cost after deducting miscellaneous receipts was Rs. 56,05,326. As most of the area consists of temporarily-settled estates subject to a revenue settlement, the greater part of this cost fell on Government. The cost of the work is examined in Chapter XIII of the report and by the Director of Land Records and Surveys. The cost works out considerably higher than that of the provincial settlement of Orissa. For various reasons it cannot be profitably compared with the cost elsewhere. The comparatively high cost is explained by several factors, some peculiar to Orissa, others to the conditions in which the operations were begun.

5. Chapter V of the report is concerned in the main with certain technical aspects of settlement work, and is of more interest and value to a settlement officer than to the general reader. One or two points are of wide interest. The Director of Land Records and Surveys observes that owing to the small size of plots, it will probably be necessary to employ a larger scale than 16" = 1 mile extensively in the maps of future settlement. Successful attempts were made to introduce more simple and less expensive methods of procedure, and the Settlement Officer's view that improvement must mainly be sought in the simplification of the processes leading up to draft publication deserves attention. A matter that certainly demands a remedy is the right of the parties to reopen, by way of objection to the settlement rent roll, disputes that have no connection with the fair rent and have already been decided at previous stages. It is recorded that more than five-sixths of the disputes decided under section 123, Orissa Tenancy Act, were of this character. The same criticism applies to the corresponding section of the Bengal Tenancy Act and has been noticed in other settlement reports.

6. The chapter on the record-of-rights deals mainly with the many curious forms of tenancy status found in Orissa. The present report perhaps adds little to the information to be found in the full examination of the matter by Mr. Maddox, nor have any substantial changes been made. Such change

as there has been is in the direction of simplification, since it has been considered sufficient to describe each status by the term necessary to relegate the tenant to his particular class under the Orissa Tenancy Act, ignoring minor distinctions which have no legal significance. The peculiar classes of sub-proprietors are discussed and it is noted that distinctions between these are tending to disappear. The High Court has, however, felt bound to recognize the distinction between *maurasi* and *miadi sarbarakars*, but has left to the revenue authorities a means by which the latter can be allowed to enjoy the privileges which have lasted for at least 90 years. The Board in a recent decision has decided to continue them for the period of the present settlement, and the position has been further challenged by the proprietor. A status, the incidents of which appear to be still unsettled, is *chandna*, which is regulated by local custom and usage. The courts in Jajpur are holding that the *chandnadar* in spite of his fixity of rent is a mere tenant-at-will, which is anomalous.

7. *Landlord and tenant—the right of transfer.*—In the temporarily-settled area the relation between landlord and tenant, except in a few estates, has been found to be good. In some of the permanently-settled estates, relations are still in a large degree feudal and personal, but while arbitrary, are not ordinarily oppressive. In some of the estates, however, there is friction arising from bad management and the survival of autocratic rule; in one estate in particular it is noted that the management is highly efficient but very oppressive. Illegal *abwabs* of large amount are found in some of these permanently-settled estates. One of the most vexed questions between landlord and tenant is the right of transfer. In the temporarily-settled area this is governed by law and in the permanently-settled area by custom. In the latter the consent of the landlord is usually required to the transfer of rent-paying lands, and the normal fee is 25 per cent of the consideration money, though in one or two cases higher fees are mentioned. It seems clear, however, that the law is indirectly tending to fix the fee even in areas to which it does not apply, and in some cases has resulted in raising it substantially (paragraphs 318, 355 and 416 of report). Section 31 has been held to apply to the Ekrajat mahal, and the fee here in consequence has also been much increased. This is one result of legislating about mutation fees which deserves consideration.

8. The law relating to the realization of transfer fees in the temporarily-settled estates is reported to be defective. The subject is a very thorny one, and cannot be discussed here. It may, however, be noted with satisfaction that the effect of granting a considerable degree of freedom of transfer has not been, as many feared, a marked incursion of tenants without agricultural aptitude.

9. The Board is inclined to agree that the landlord himself should be liable for neglect by an agent to deliver proper rent receipts, a provision which finds place in the Chota Nagpur Tenancy Act and does no more than place on the landlord a responsibility which he should be called upon to bear. The Board notes with interest the view of Mr. Dalziel that the limitation of suits for produce rent has been effective in saving the tenants from harassment. It is to be hoped that the enactment of the same period of limitation for Bihar will have the same result.

10. The problem of pasture land is growing more and more acute in the Orissa coast districts. It appears to be now too late, if indeed it was ever practicable and economically desirable, to reserve in each group of villages a sufficient area to allow the plough cattle to subsist mainly by grazing. But it is satisfactory to find that steps have been taken to safeguard to a much greater degree than heretofore the village common lands available for exercising the cattle. The position is however, by no means fully secured and it would seem that legislation is required to provide some lesser penalty than the very drastic one of cancelling a revenue settlement against a landlord who prefers his private advantage to the needs of the community from whom he draws his income.

11. There are several other points put forward by Mr. Dalziel and the Director of Land Records; Mr. Mansfield, to which careful attention should be given when the Orissa Tenancy Act is examined with a view to its amendment.

But since it is unlikely that this will be done until Orissa has her own legislature, there is little advantage in further expression of opinion at the moment. It is fortunate that the later stages of the settlement were under the direction of, and the review of this report was written by, an officer of Mr. Mansfield's sound judgment supplemented by experience of the problems of the settlement from almost its earliest stages. To him the Board thinks a large share of the credit for the success of this difficult operation should be assigned. Mr. Toplis started it on sound lines in circumstances which imposed a severe tax on his patience and a heavy strain on his physical energy. Messrs. Scotland, Reuben and Rai Sahib Phanindra Nath Gupta, both in subordinate and in superior charge, worthily maintained the reputation for zeal, thoroughness and fairness to all parties, which the public has learnt to assume as characteristic of officers employed on settlements in this province. Mr. Senapati and Babu Nalini Kanta Ghosh did first class work as Charge Officers, and Mr. Samuel Das especially distinguished himself in the difficult task of revenue settlement. The Board particularly commends the services of Mr. Dalziel himself, who has written a succinct and yet very valuable report on the operations which have now been brought to a successful close. The future Government of Orissa is fortunate in succeeding to the labours of these and the very many other deserving officers, whose work has enabled the new province to start with an up-to-date record of the rights of all persons having interest in the lands of the three coastal districts, and a full appreciation of the tenancy problems, which will no doubt come under review at an early date after the inception of the province.

I have the honour to be,

SIR,

Your most obedient servant,

S. HAIDAR,

Secretary.
